Ragnarok mobile eternal love level guide

ragnamobileguide.com/leveli...Page 2ragnamobileguide.com/leveli... 23 SharesRagnarok M: Persuual Love is the latest MMORPG game, released on mobile recently in Oct 2018. Yes, the disgraced Ragnarok with cute characters is back and now available on Android and iOS platforms. I've been playing the game for a month now and I think it's time to reveal how quickly to offset in this latest Ragnarok niging guide. This game can be very addictive when you start. If you want to increase the character base and work levels so that you can proceed faster to change your job in Ragnarok Mobile, you've landed on the right. Here are some basic steps to balance your Ragnarok sign faster. The regulation of the character in Ragnarok's Everless Love may take a long time, but with this guide you will experience the so-called niging power. This guide is suitable for all classes including Priest, Mage, Wizard, Ranger, Assassin Cross, Rogue, High Wizard, Champion, Crusader and so on. I've experimented with fast niging on multiple characters, it works great and I'm here to share with you this tips & guide to increasing your Ragnarok M speed niging characters. 1. Consuming food to increase ATK damage Eating meals or food will increase your ATK, M.ATK, DEF, etc. up to 208 minutes. Let's say you ingest 3x the same foods to increase M.ATK, your M.ATK will increase 3X for this duration. Different types of food has different effects, some increase AGI, Int, Dex and so on. So be sure to eat food that benefits your character. If you have a priest, eat food to increase int and dex so that the effect will increase the magical damage of the attack. This means that with the increased damage of the attack, you can kill the monster as soon as possible and move on to the next one. 2. Party Up, Get Buff & Level Up Fast with DPS Rangers & Bard/Dancers! A priest can cause great damage to the demons, they are also good supporters of teammates. A priest can be useful for the level of character upwards. Invite the priest to the party. Priest's 'Blessing' skills can buff and boost your stats, increase your defense, injury attack and AGI, as well as lite shield skills such as Kyrie Eleison, so that monsters will temporarily miss their hits, so you will hit faster to kill monsters before the skill cast ends. Also combine with a group of Rangers, Bards or Dancers as you can hit fast and have high DPS, the more rangers in the fun more EXP you get! 3. Complete all Mission Committee Quests In this niving guide to increase your character level faster, I suggest completing all mission committee quests. This could be quite tricky when you're doing board quests because you need to go back and forth, but you can complete all the search using your Adventure Meatball. Use Adventure Meatball to buy 10 Mercenary's Mission scroll based on your current base level. Now go to the mission and click on all 10 tasks. You can easily complete all 10 Immediately. This method will add a lot of EXP to the base level & work. You can get Adventure Meatball from your assistant or by tapping on your pet. 4. Complete all monster resistance Quest Find messenger monster watcher NPC, which is available in all cities. Resistance monsters gives 10x EXP profit and is a great way to increase your base and working level EXP. It is recommended to complete all resistance monsters for further increase EXP and best to complete the mission in the proposed map area. You will see that your base and work skill level increases faster than before when you take over the monster resistance mission. Resistance monsters limited to 2x per day, but you can stack up to a maximum of 6 missions. Complete all 6 Resistance Monsters and 10 Mission Board for fast niving will be at least up to level once a day. Have fun with guilda members or use auto part-up to search for players to complete monster resistance search faster. 5. Complete all Master Quests and Side Quests Level up by completing all Major Quests, Mini Quests & Side Quests Always watch out for NPCs with characters vkliska. Main find a lot of exp and recommended to complete everything when you see it. The main quests are marked with a red exclamation mark on the NPC, while the side quest is marked the green color of the exclamation mark. When you're done find the task, you'll get the base & job level EXP. 6. Complete all Bard Story Quests Find Minstrel NPC for Bard Story Quest. Story type quests can take a long time to complete because you need to kill 300 monsters on a story quest. If you follow this guide to niving, you can quickly complete these stories by partying up with members or friends from esnada. This will help you kill 300 monsters faster. You may also need the help of a player in the fun with the speed of rapid attack and make high monster injuries. 7. Join in Fun, Kill Steal & Level Up What Does It Mean? Often you will see a group of players running around killing the same monsters. Activate your auto-attack and join the fun, you will see your character running along with others killing monsters and kill to steal (KS). This will help you to complete your monster quest faster than killing your own on one. 8. Increase Stats and Job Skill Level More Damage Hit for Monsters, the more EXP you get to level up quickly by increasing your character ATK, M.ATK and max out your workplace level skills, you will do more damage to the monsters, therefore, gain more EXP for your character. 9. Hire KittyCat Different KittyCat types bring different effects between your adventures and killing monsters. Hiring an aggressive KittyCat will further damage the monsters, so reduce the killing time. E.g. Maysa is a mag type KittyCat and will attack the monster for you with M.ATk. More Leveling Tips: There are many articles out there about the niving guide, but this post is different from others. If you prefer to watch the video tutorial more than reading, I suggest you check out this Ragnarok Downs a video of a fraudulent sheet that can help you quickly handle your character with additional details. 10. Use Base EXP & Job Inflates Using Working Travel Machines in Your Bag is a great way to increase your basic EXP and work level even faster. Send your extra pets to work and earn rewards such as Lightning chains, monster materials, consumables, basic potions, working potions and much more. Let your pet work at the Item Store and get a job and basic EXP potion every 50 minutes. The potion can increase the adventure BASE EXP or Job EXP by more than 100,000 points. Depending on whether you get the poasers marked 'M', 'L' or 'XL'. 11. Use the meteor chain After updating to Ragnarok M Episode 6 with reduced fighting time, the Meteor Chain is introduced into the game. Players can now gain 4 times more EXP and fall for 30 minutes. Players can acquire meteor chains by joining events or using the Great Mentor's License (available only for Mentor). Players can figure out how to get a Mentor License & increase combat time for longer grinding or niving in Episode 6. Cooking center – Acquires an adventure of meatballs every 30 minutes. Use adventurous meatballs and complete the committee's daily mission to locate. Item Shop – Get lots of useful items, especially inflates for BASE EXP & Job leveling. Kafra Co. – Randomly you will receive a Big Cat Voucher, Dyestuffs, Kafra Storage Tickets, Teleport Tickets, More Coins and much more. Pet Association – Randomly receive colorful shell or five EXP Potion every 60 minutes. Help with a smile – get a one-coin every 40 minutes. There goes the top 11 basic quick niging guide for Ragnarok M Persuasion Love and I hope this useful guide will help you to level up your Ragnarok characters in an instant. Happy hunting!23 Shares When talking about MMORPG promotion systems, Ragnarok has always stayed true to his roots. Also in the latest iteration, as we mentioned in our review on Ragnarok M: The Everrm love, developers have retained the same promotion system in which your character has two types of levels: basic level and level of work. Each of these rates is increasing in the same way with experience in fulfilling tasks in the world. The difference between two types of level is that you will receive attribute points to increase the base level, and to increase the level of work, you will receive points of knowledge and skills. This system lends itself to the widest range of character sets – or builds, as we call them in the gaming community – that offer interesting and diverse results. However, the hardest thing about progressing in this game for us, especially since it has been about 10 years since we last played Ragnarok, is that they know how to level the level in time. Because we're talking about the Korean game, the progression revolves mostly around completing daily missions or grinding the mafia on the map. However, the hard part stems from which places are best for grinding, or in finding the right tools that you will have to overcome who roam around. Fortunately, Ragnarok M offers a number of alternatives to speed up the niging process. In this guide we will discuss the most common methods for collecting experiences in this game. NPC Missions As soon as you start your adventure, and especially if you choose a class that relies on spells to do damage, it will be somewhat difficult to grind for the experience. For this reason, you will rely primarily on completing progress missions at all the first few levels. Fortunately, there are many missions in this game, some of which offer more experience than others, but all end up contributing to strengthening your avatar in the long run. To begin with, we propose to stick to the main mission stories at the outset: these are not only good because they give tone of experience, but also unlock a number of functions, including an extremely important mission committee, a bulletin board in Prontera, through which you can pick up everyday tasks and tasks that give tone of experience. From level 1 to 10, we suggest you stay in Prontera South Gate and complete each mission. Specifically, we recommend visiting Poye and completing all the tasks he has in store for you, and that will eventually lead you to your first job change when you reach level 10. It's important to know that missions marked with green ing are optional side suggestions - sometimes unlocking new things, while tasks marked with brown ings represent stories that usually give you more experience and lead you into new areas. In short, if you're going to be in some new area, we recommend that you run around and pick up all the missions you can. This way, when you're done grinding, you'll also be able to turn around missions for some extra experiences at the end of the day. Missionary Committee As soon as you reach level 15 and make sufficient progress on the story in West Prontera, you will be given access to the Mission Committee. On this you will find a list of requirements and tasks that refresh on a daily basis, and that range from defeating a certain number of enemies, collecting a fixed number of items and delivering them to NPC for shooting in specific locations, among other things. In addition, the rewards for completing these missions are usually better than those that progress in the story. Therefore, the tasks of the Mission Committee will always be prioritised over other daily tasks. Play Ragnarok M: Persuading Love on BlueStacks! In other words, if you can only play for a short time and want to increase your daily progress, we recommend that you complete your daily missions and call it the day. Rift Fixing After unlocking the Mission Committee, you will also gain access to a ragged determination mission in which you can only participate with a client or group of adventurers. These missions revolve around difficult challenges in which you must defeat the many enemies that expire from a torn portal. V that you need to overcome and the time you need to survive varies depending on the difficulty of flourishing. However, these missions give huge amounts of experience, as well as the opportunity to match the exclusive luxury supplement. However, you can only participate in up to 5 break-ups a day. In addition, they are very difficult to complete, so try them only if you have a group of seasoned adventurers. Grinding Tips If you have already completed all your daily missions and would like to continue getting experience, then we recommend that you search for a good place to stay for a few hours and start killing monsters in order to gain some level. However, in order to optimize your efforts, you need to keep in mind several things. To start with the grinding process working properly, you must have sufficient stamina. When you play and beat monsters, your character will start to get tired and, when he gets completely tired, the experience you receive from killing monsters is significantly reduced. In this way, if you are to be ground, we recommend that you do so only if you have enough stamina. Your character recovers 300 minutes of endurance every day, which can accumulate up to 600 minutes. In addition, if you gain endurance from an external source, such as quests or other objects, you can transfer 300 extra minutes up to a maximum of 900 minutes of endurance. You can't have more stamina than this ceiling. Note that always consult with available endurance in the More &t: Settings menu. Every time you go out, grind, and especially when you're using the auto-combat feature, it's possible to run into monsters that could make time difficult for you. That's why it's important to always eat a meal before you go out. In this game, food allows you to recover HP and SP gradually accelerated every time these two stand fall below 70% and 40% respectively. In this way, you can stay healthy and filled while your characters distort the damage, and reduce the likelihood of losing experience due to early death. A dish of free food can be picked up daily at the prontera food store. Each dish fills a fixed amount of HP and SP, after which the effect disappears. And last but not least, Lightning chains are the perfect tools to speed up the grinding process, but only if you have enough endurance. In short, what this element does is spend your stamina at twice the speed, and give you a double experience on the mob defeated, as well as a greater chance of gaining valuable drops in the meantime. Each chain lasts 60 minutes, and you're limited to 7 a week. In addition, you can obtain them by several means, including completing certain missions. The balancing process in Ragnarok M: Persuading love can be a bit nagnacable if you don't know what you're doing. Fortunately you have this guide as well as other articles in our blog to help you with your adventures Rune-Midgard. We specifically recommend that you look at our BlueStacks guide to use for this game so that you can enjoy everything it has to offer with the convenience of using the mouse and keyboard.
